

MINI LED Lights

High Intensity 'Mini' multicolour or white LED lamp. Environmentally friendly, thanks to its long life (100,000 hours) and high energy efficiency (up to 80% less power consumption than a traditional lighting system). A choice of fixed colour or automatic sequencing can be used to create a range of different effects.

3 x LED's per lamp: 1 x red, 1 x green and 1 x blue (multicolour) or 3 x white

Initial output 143 lumens

Maximum Power consumption 11W per unit

Multicolour lamp has 12 function modes: 6 fixed colours and 6 sequences

Multicolour lamps must never be connected directly to 12V. Always connect via controller PLCB200.

White Mini lamp works at 12V

Complies with IPX8 protection

White ABS or Stainless Steel faceplate

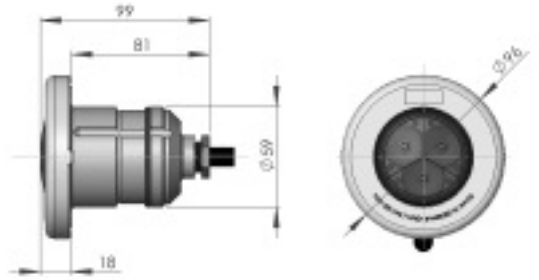

The PLCB200 control box supplies the correct voltage required for the Mini LED lights and features a push button controller.

12 function modes: 6 fixed colours and 6 sequences

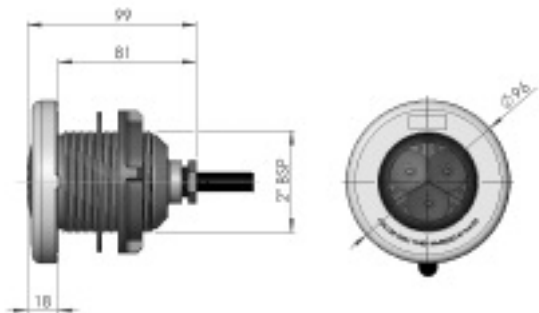

Controls maximum 4 Mini LED lights
Colour/sequence is on rotary cycle

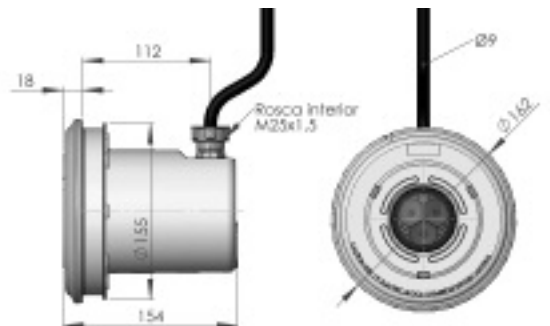

PLSC100W (Multicoloured)
PLSCW100W (white)

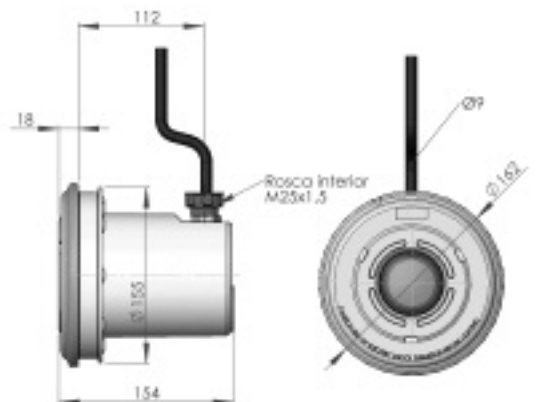

PLSC200S (Multicoloured)
PLSW200S (white)

PLSC300C (Multicoloured)
PLSW300S (white)

PLSC400P (Multicoloured)
PLSW400P (white)
