

CERTIKIN OVERFLOW SPAS

Information

These Spas are made to the highest standards in one of Europe's most modern factories.

These spas have a high wear resistance due to high quality Acrylic used and have a roomy feel. This is due to the increased interior space available when compared to spas of similar sizes.

All the spa pipework is carefully aligned to give good hydraulic flow resulting in superior hydrotherapy jet performance.

All spas are available with support leg frames as standard equipment and come with a full 5 year warranty on the spa shell and 2 year warranty on the spa components except items like the light and bulb.

These spas will work with the commercial Certikin spa packs and balance tanks but can easily be made to work with a domestic spa pack for a customer who wants a deck level spa in their home.

Colour Choice is Blue Marble or White.
